

# GET THE FACTS & GET THE RIGHT DISPOSER FOR ALL YOUR NEEDS

## Info & Facts To Know About Kenmore® Food Waste Disposers

When shopping for a dishwasher, you should also consider purchasing a food waste disposer. A Kenmore® Food Disposer is a convenient and quiet way to save time and effort when cleaning up in the kitchen.

### Before You Buy A Food Waste Disposer, You Should Consider:

- **The types of foods you usually cook**

If you often grind tough items like bones or fruit skins and pits, you'll require a more powerful motor (3/4 horsepower or more). Keep in mind; Models # 60793 and # 60591, both with the Auto Reverse feature, are the best choices to minimize jams when grinding these items.

- **The number of people in your family and the number of times you cook per week**

Our most powerful 1.0 hp disposers are perfect for large families or ones that do a lot of cooking. The more food you attempt to grind at one time, the greater the risk of jamming and the more important it is to have a powerful motor.

- **The importance of quiet operation**

Most people prefer the quietest disposer possible. The Kenmore Elite® Disposer Model #60793 is 40% quieter than any other disposer in the Kenmore® line-up.

### Frequently Asked Questions About Food Waste Disposers

#### **CAN DISPOSERS BE USED IN HOMES SERVICED BY SEPTIC SYSTEMS?**

Yes. If your house was designed to have a washing machine and/or a dishwasher, your home will have the capability to have a food waste disposer.

#### **DO I USE HOT OR COLD WATER WHEN RUNNING THE DISPOSER?**

It's important to always use a continuous flow of cold water when grinding food waste. Cold water hardens and compresses the greases in food wastes so that it flows easily through the water line. Hot water causes grease to dissolve and coat the inside of the piping which may eventually cause a blockage.

#### **CAN I GRIND HARD MATERIALS SUCH AS BONES IN THE DISPOSER?**

Yes, you can grind hard materials such as bones and fruit pits. Disposing of these hard items is actually beneficial to the system because as they pass through the grinder, a self-cleaning, scouring action is created by the particles.

#### **WHAT SHOULD NOT BE PUT IN THE DISPOSER?**

Don't put clam or oyster shells, large amounts of soft fibrous waste such as corn husks, celery, bean pods, or harsh chemicals like drain cleaners in the disposer.

#### **Did You Know?**

The Kenmore Elite® Food Waste Disposer Model #60793 carries a full 10-year in-home warranty on parts and labor.

#### **Did You Know?**

The average life of a disposer is 8 to 10 years!

**#60793**

**KENMORE ELITE® 1-HP DISPOSER**

**Top-of-the-line disposer features full stainless steel construction and the highest quality components and design.**

- Extra Heavy-Duty 1-HP Motor provides excellent grinding efficiency with minimal jams

**KENMORE® LARGE CAPACITY 1/2-HP DISPOSER**

**All the features of the Model #60571 except this model has:**

- 1/2-HP Motor
- No sound insulation
- 1-Year full In-Home Warranty on parts and labor

## DISCOVER THE ADVANTAGES OF KENMORE® DISPOSERS

### Key Features & Benefits

#### Induction Motors

All Kenmore® disposers use induction motors, which are quieter than permanent magnet (PM) motors used by some other brands. An induction motor won't cause interference with your television when it's on.

#### Steel Construction

The easy-to-mount assembly is made of galvanized steel and the sink flange is stainless steel – both far more durable than the plastic used by other brands.

#### Wrenchette Included

Every disposer includes a wrenchette to allow users to clear any jams quickly and easily.

#### In-Home Service Warranty

Kenmore® offers the best in-home service warranties in the industry, covering both parts and labor for any defects in material or workmanship.
